IGNITE

IGNITE ENERGY PRODUCT OVERVIEW

THE HEALTHIER WAY TO GET THE ENERGY YOU NEED EVERYDAY!

There is **ONE QUESTION** everyone should ask themselves before consuming an energy drink...
“WHAT’S IN IT?”

Our proprietary energy formulation was designed after spending countless hours of research to identify the right, “must have” ingredients. This relentless approach allowed us to create a product that provided beneficial energy without the typical crash or jitters.

NATURAL, HIGH-QUALITY INGREDIENTS

- Organic **Green Coffee Bean Extract**: Our blend uses the natural caffeine from Organic Green Coffee Bean Extract which has been shown to provide additional benefits like powerful antioxidants and a boost to the metabolism.
- **L-theanine**: Works to sustain long-term energy, promoting a prolonged and sustained energy.
- **Methyl Foliated B12**: Helps your body produce natural energy as well providing a boost to your immune system. This non-synthetic B12 can be absorbed by the body so it’s available for use.
- **Digestive Enzyme**: Aides the body in breaking down the food you eat so that you don’t use excessive energy during the day digesting your food.
- **Rhodiola Rosea**: Helps strengthen the body’s response to physical and psychological stressors.
- **CoQ10**: Improves heart health, increases energy, and enhances mental clarity.

Each ingredient plays a unique role, providing the perfect synergy to create a natural, sustained energy without the toxic, harmful additives that distress your nervous system or harm your health.

SUPERIOR ABSORPTION

Absorption is the KEY! Did you know most of the time you are only absorbing 30% of the ingredients you consume? If you don’t absorb them, how can your body use them? We use natural, high quality ingredients coupled with absorption focused technology to ensure our products have high bioavailability...in other words, you actually get what you paid for!

PRODUCT BENEFITS

- ✓ Elevated Energy
- ✓ Enhanced Metabolism
- ✓ Improved Focus
- ✓ Increased General Well-Being
